PROFILE

Through several experiences, I have developed what I believe to be my greatest strength: the ability to learn quickly and independently, resulting in tangible accomplishments.

As a result, I have gained expertise in a variety of areas, including Agile methodologies, Scrum framework, iOS, Android, web development, Windows development, IT, Genexus, design (Adobe Products), and architecture (Autocad, SketchUp), among many other programs that I have learned over the past 10 years to successfully execute projects under my leadership.
